

## CORPORATE PROFILE

NDM has been providing clients with a complete range of networking services and solutions since 1994. We offer our clients the premier products in the industry, tailored to their specific needs and requirements. Our engineers hold the top certifications in technologies from Microsoft, VMware, Cisco, NCP, WatchGuard, Novell, Barracuda, HP, BlackBerry and many others.

Our clients include private and public sector organizations of all types. We provide solutions to banks, small to large sized businesses, school districts, universities, manufacturers, hospitals, and state and local government agencies. Our clients operate locally, nationally, and internationally.

The NDM approach is simple - we take the time to understand each client's needs, then use our technology expertise and experience to offer the best solution. We don't just implement technologies for our clients - we take on the day-to-day accountability for managing and maintaining them as well. As a result, we take an owner's perspective with everything we do.

## OUR SOLUTIONS

**Data Storage and Continuity:** NDM provides unparalleled data backup storage with on-site and off-site options for your critical files. We ensure that you will have access to applications and data in the event of unexpected system interruption - with minimal downtime and business disruption.

**Virtualization:** Organizations are utilizing NDM services for virtualizing at all layers of their architecture, from servers to desktops, storage, networks, and applications - to help reduce cost, improve service and manage risk. By making the infrastructure much more flexible, virtualization can enable IT resources to be allocated faster, cost effectively and dynamically.

**Information Security:** NDM has expertise in designing and implementing integrated network security architectures across multiple platforms. We assist with compliance, audits, infrastructure protection, network monitoring, and support.

**Procurement:** Save on hardware and software costs by purchasing all your IT equipment through NDM procurement services. We distribute thousands of products at the best price/payment options.

## OUR SERVICES

**Professional Services:** NDM's professional IT services include Assessments and Planning, Consulting and Design, Implementation, and Project Management. Structured for the needs of our customers, services can be delivered as a focused, single project or combined with our LeanTec Managed Services as a total lifecycle solution.

**IT Staffing:** We provide temporary IT staff or long-term contractors for supplemental staffing, special projects, for when a company isn't ready to commit to a permanent employee, or when employees are on extended personal leave. The most popular skill sets placed include: 24x7 technical phone support, network design and implementation, Microsoft OS and Exchange migration, Novell and GroupWise support, LAN/WAN administration, desktop support, help desk staffing, and project management.

**LeanTec Managed Services:** NDM's management program supplements an IT organization with as much managed service as is needed - from remote network monitoring, desktop maintenance, a 24x7 help desk, and onsite technology staff to project management and shadow CIO services.
