

# RSA® Archer™ eGRC Platform

Automate, integrate, manage and report  
across your enterprise

## AT A GLANCE

- Manage policies, controls, risks, assessments and deficiencies through one central platform.
- Automate business processes, streamline workflow and deliver real-time reports across your enterprise.
- Put control into the hands of your business people, enabling them to tailor RSA Archer eGRC Solutions and build new applications without development resources.
- Integrate with external systems to support data analysis, process management and reporting.
- Select an on-premise or software as a service (SaaS) deployment, according to your needs.
- Download pre-built applications and integrations from the Archer eGRC Exchange.

## OVERVIEW

RSA® Archer™ eGRC Platform supports business-level management of enterprise governance, risk and compliance. As the foundation for all RSA Archer eGRC Solutions, the Platform allows you to adapt the solutions to your requirements, build new applications and integrate with external systems without touching a single line of code. RSA's no-nonsense, flexible strategy has won over some of the most demanding Fortune 500 companies. These businesses have seized the power of the Platform to make RSA Archer solutions their own and to model additional business processes in a fraction of the time it would take to develop traditional custom applications.

## KEY BENEFITS

The RSA Archer eGRC Platform is:

- **Flexible.** The Platform offers a point-and-click interface for building and managing business applications. Non-technical users can automate processes, streamline workflow, control user access, tailor the user interface and report in real-time.
- **Unified.** RSA provides a common platform to manage policies, controls, risks, assessments and deficiencies across lines of business. This unified approach eases system complexity, strengthens user adoption and reduces training time.
- **Collaborative.** The Platform enables cross-functional collaboration and alignment. Business users across IT, finance, operations and legal domains can work together in an integrated framework using common processes and data.

## PLATFORM COMPONENTS

### *Application Builder*

Tailor RSA Archer eGRC Solutions to your unique methodologies, and build on-demand applications through point-and-click configuration.

### *Reports and Dashboards*

Take advantage of RSA's pre-built reports and dashboards, and create your own with RSA's user-friendly web interface.

### *Business Workflow*

Define and automate business processes for streamlining the management of content, tasks, statuses and approvals.

[Data Sheet](#)

“[RSA] Archer is a disruptive force in the GRC market today. They offer one of the most versatile and easily customizable platforms on the market that can be swiftly tailored to meet any GRC process and content issue.”

MICHAEL RASMUSSEN, LEADING GRC AUTHORITY AND PRESIDENT OF CORPORATE INTEGRITY, LLC

#### About RSA

RSA is the premier provider of security, risk and compliance management solutions for business acceleration. RSA helps the world's leading organizations succeed by solving their most complex and sensitive security challenges. These challenges include managing organizational risk, safeguarding mobile access and collaboration, proving compliance, and securing virtual and cloud environments.

Combining business-critical controls in identity assurance, encryption & key management, SIEM, Data Loss Prevention and Fraud Protection with industry leading eGRC capabilities and robust consulting services, RSA brings visibility and trust to millions of user identities, the transactions that they perform and the data that is generated. For more information, please visit [www.RSA.com](http://www.RSA.com) and [www.EMC.com](http://www.EMC.com).

#### Access Control

Enforce access controls at the system, application, record and field levels so users interact only with the information that is relevant for their roles.

#### User Experience

Brand the RSA Archer eGRC Platform with your corporate colors, graphics and naming conventions to maximize end-user adoption and facilitate self-training.

#### System Integration

The vendor-neutral RSA Archer eGRC Platform serves as a point of consolidation for governance, risk and compliance information of any type. The Platform allows seamless integration of data systems without the need for additional software. You can automate the movement of data into and out of the Platform to support data analysis, process management and reporting.

#### Platform integration capabilities include:

- **Data Feed Manager.** Flexible, code-free tool for consolidating information within the RSA Archer eGRC Platform.
- **Data Publication Manager.** Allows users to automatically extract information from the Platform and load it into external systems for advanced data analysis and modeling.
- **Web Services API.** Supports integration with other business systems using the industry-standard SOAP protocol.
- **User and Group Synchronization.** Supports Active Directory and LDAP integration of user accounts and groups.

#### DEPLOYMENT FLEXIBILITY

RSA supports both on-premise and software as a service (SaaS) deployments of the RSA Archer eGRC Platform, allowing you to balance administrative control, time to value and cost considerations when planning your implementation. You have the freedom to deploy the Platform in the most appropriate environment based on your current needs and to move applications from one environment to another as your needs change.

#### ARCHER EGRC EXCHANGE

Visit the Archer eGRC Exchange to take advantage of pre-built applications and integrations for the RSA Archer eGRC Platform. All Exchange applications undergo stringent certification testing to ensure that they provide the quality, performance and ease of use that you require.
