

EMC CAPTIVA EMBEDDABLE TECHNOLOGY SOLUTIONS

Providing document imaging solutions experience, innovation, and reliability for over a decade

ESSENTIALS

With EMC Captiva Embeddable Technology Solutions you are provided with the essential tools to help you quickly develop competitive document scanning and imaging solutions to compliment your line of business (LOB) applications. The business solutions created from these technology products can transform piles of paper-based documents into usable business-ready digital content and can help you:

- Save time and money
- Improve overall productivity
- Generate new revenue streams

The paperless office is a myth. In spite of countless computer-driven processes, most offices still find themselves submerged under reams of paper: paper contracts, paper purchase orders, paper packing lists, paper invoices...the list (undoubtedly paper) goes on.

To remain competitive, a business must be able to effectively bridge the gap between its paper-based processes and its computer systems. The solution is in imaging—transforming printed information into digital, manageable business-ready content. And there is no more established, more reliable and relied-upon provider of imaging tools than EMC® Corporation.

We set the standard for professional imaging tools, providing solutions for the entrepreneur and the enterprise—and everywhere in between. We offer out-of-the-box solutions (QuickScan™ Pro), and software developer kits (PixTools®), and we are the creators of ISIS® (Image and Scanner Interface Specification), the de facto gold standard in scanner interface technologies.

EMC CORPORATION DELIVERS

We understand that every business wants: 1) to save time and money, 2) stay highly competitive, and 3) mitigate risks. Many vendors promise to address these concerns, but they never quite get around to saying how. At EMC, we don't offer intangible promises; we offer concrete proven solutions.

Here's how we'll help you save time and money:

- **Rapid application development:** The less time spent developing your application—with solid and proven toolkits and drivers—the faster your ROI.
- **Lower support costs:** The ISIS standard, on which our imaging solutions are built, is a proven-reliable interface based on code that has been used and refined for more than a decade.
- **Lower integration costs:** Our products work within all major environments and hardware interfaces since interoperability is the key.

Here's how we'll help you become more competitive:

- **Faster, more complete support:** ISIS and PixTools enable your software applications to include more compatible, and more reliable, document scanner support.
- **Localization:** Our software developer toolkits already support German, French, Japanese, English, Spanish, and Italian, with other languages easily and readily added.
- **Increased company profile and visibility:** Your company will be listed on our site alongside industry leaders such as Adobe, IBM, and many others.

Our customers

Our customers are leading suppliers of document capture and imaging software and peripherals. The companies listed here and hundreds of smaller VARs, vendors, and MIS professionals trust EMC Corporation to provide critical components of their capture and imaging solutions. Altogether, hundreds of thousands of users rely on EMC Corporation every day. Here is a small sampling of our existing customer base.

ABBY	IRIS
Adobe	Knowledgelake
ACS Systems	Kofax
BancTec/Plexus	LexisNexis
Böwe Bell+Howell	LMI Technology
Brother	MetaSource
Canon	Nanosoft
Datacap	Nuance
Digitech	Opentext
DocuWare Corporation	Panasonic
Eastman Kodak	Ricoh
eCopy, Inc.	Readsoft
Epson	Sage
Experian	ScanOptics
FileNet	Siemens
Fujitsu	U.S. Patent & Trademark Office
Genix	Visioneer
Hewlett-Packard	Vodafone
Hyland Software, Inc.	Wave Imaging
IBM	Xerox
Imaging Station	
Infosoftware	

Here's how we'll help you reduce risk:

- **Industry:** EMC Captiva is the undisputed leader in high-volume intelligent enterprise capture solutions, and our ISIS standard is the leading, enterprise-level scanner interface technology. We are the document scanning and imaging experts in our industry, and have a time-tested track record of success.
- **Proven-effective, award-winning tools:** We received the first-ever Special Award for Standards Implementation Excellence for our ISIS standard from AIIM, and we haven't looked back as our solutions are currently in use by large enterprises and multi-national companies.
- **Compatibility and reliability:** Our toolkits and document scanning solutions are based on our ISIS scanning API, which has been proven, refined and improved upon for more than 10 years and is currently compatible with more than 400+ document scanners. When it comes to compatibility and reliability, choosing our embeddable technology solutions is a no-risk decision.

OUR TECHNOLOGY PRODUCTS

Whether you need to simply transform piles of paper in your business into readily usable digital content, or you're looking to develop an enterprise-level imaging application, we can provide help with a customizable suite of reliable and proven-effective products:

- **PixTools:** Our suite of software development toolkits can help you get an imaging solution up and running in only a day, and enable your application communicate with more than 400+ document scanners. Our toolkits include:
 - PixTools for .NET can help you build custom document capture and imaging applications in .NET environments
 - PixTools Distributed Imaging can help you create intelligent web-enabled distributed capture and imaging applications. .
- **ISIS Drivers:** ISIS is the industry standard, enterprise-level interface that unites a universe of scanners and applications, supporting every feature of leading document scanners, and allowing them to run at their rated speeds. Value-added resellers (VARs) and commercial software vendors will see marked improvements in client satisfaction with this high-level proven scanner interface.
- **QuickScan Pro:** The out-of-the-box desktop solution for document imaging and data capture. Ideal for business looking for an entry-level document scanning and imaging solution.
